

# EVERYTHING YOU NEED FOR YOUR TRACKING WORK.

## Turtle & Tortoise Tracking

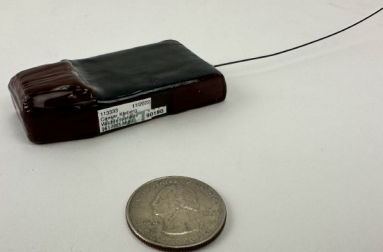

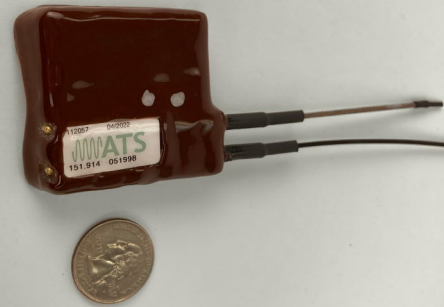

### VHF TRANSMITTERS

ATS has been a pioneer in VHF animal tracking since 1960's. Our R1860, R1920 and R2020 models are our most popular for turtle tracking. Battery life ranging from 99 - 1156 days. Weights from 6 - 24 grams to match up with allowed weight per reptile being tracked. These units can provide Mortality, Coded, Temperature, Activity and other signals. ATS VHF transmitters can match up to your study requirements.

### W510 WILDLINK GPS LOGGER

W510 Wildlink GPS Logger gives you GPS position logging (lat/long), retrieve data via wireless communication link. Used on tortoises, reptiles, and turkeys, attached using glue or a backpack. Units can have one - two AA batteries giving 1.75 - 3.5 years of life based on 3 locations per day & 8 hours of VHF per day. Units can weigh between 45 - 65 grams in various layouts. Units can hold 32,000 lat/long locations.

### L20 SOLAR-CELL TRACKER

A 35 gram wireless GPS location logging "Tracker" featuring 4G LTE Cellular communication and solar-cell assisted power for longer life. Unlimited FREE data access included with every device.
