CELLULAR GPS TURKEY TRACKER

Introducing our special-design cellular GPS device made for turkey tracking. It weighs about 80 grams. The L20 is a wireless GPS location logging "Tracker" featuring LTE-M Cellular communication and solar-cell assisted power for longer life. Unlimited FREE data access is included with every device. An integrated VHF transmitter allows you to track the animal in the field as well.

- Device dimensions are 84mm x 37mm x 20mm. It is equipped with a 1900 mAh battery and two 150mW solar panels.
- The tracker has ~120 days of runtime without sun using 6 location a day, uploads every 2 days, VHF on 8 hours a day.
